

## Judging Report GrootGroenPlus 2020

<b>Silver</b>	<b>Applicant</b>		<b>Score</b>
Carpinus betulus 'Minoor1' (MINOR GLOBE)	Van Vliet New Plants BV, Stroe	Small tree with a spherical crown, grafted on a high standard; considerably broader growing than other compact varieties; leaf margins conspicuously serrated; rather vigorous growing young shoots will need regular pruning; widely usable.	7,6

<b>Bronze</b>	<b>Applicant</b>		<b>Score</b>
Cryptomeria japonica 'Kyara Gold'	Sierteeltkwekerij Kools, Deurne	Capricious growing and therefore difficult to grow uniformly, but of much interest for connoisseurs or as a specimen; mature foliage green, young shoots greenish yellow; individual needles typically folded around twigs, like in 'Rasen'.	6,6
Leucothoe 'RANT01' (FIRESTAR)	Van Vliet New Plants BV, Stroe	Fresh looking variegated plant; the leaves aren't striped bud margined, contrary to other variegated Leucothoe; young shoots bronzy red, but not very intensely coloured; slightly untidy plants.	6,7
Metasequoia glyptostroboides 'WAH 08AG' (AMBER GLOW)	Sierteeltkwekerij Kools, Deurne	More or less like the well-known 'Ogon' (GOLDRUSH), but the foliage is less intense yellow-coloured and therefore less prone to sunburn; vigorous tree, well-presented.	6,9
Skimmia japonica 'Bolwi173' (GOLD SERIES MIRACLE)	Skimmia Kwekerij Bolwijn BV, IJsselmuiden	Handsome, well-shaped plants, vigorous and with relatively thick twigs; the flowerbuds have a somewhat indeterminate colour.	6,2
